NEW TOMO MAMMOGRAPHY Markers - Radiopaque

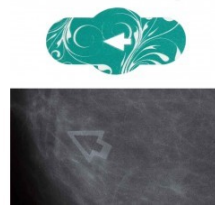

These 3D NEW Tomo Markers are used for 3D digital breast Tomosynthesis. These low density markers are specially designed to show up clearly when “in slice” and minimize the “slinky” artifact when out of slice.

MAMMOGRAPHY MARKERS

Nipple Markers

Virtually eliminates repeats in mammography with clear nipple identification.

Available in 1.5, 2.0, 2.5, 3.0, 4.0, 5.0 mm

Available in dots, wings & strips for prominent nipples, and even super sticky!

Skin Markers

Radiolucent Mole markers will not burnout and are ideal for MLO exams and dense breast tissue. Scar markers reduce confusion and ensure precise & easy placement.

Palpable Area Arrow Markers

Digital Skin Markers
